Attachment to Advisory Action

This advisory action follows a response filed on March 22, 2010. Applicant has amended independent claim 44 to exclude an alternative embodiment, $Q = CH(R^8)W(R^6)(R^7)$, as a metallocene-based ligand. The proposed amendment raises new issues that would require further consideration and further search. Additionally, proposed amendment, in which six metallocene-based ligands of the prior art are excluded, raises the issue of new matter. Such a proviso was not described in the specification in such a way so as to reasonably convey to one skilled in the art that the inventors, at the time the application was filed, has possession of the claimed invention. See paragraph 2 of the final office action dated December 22, 2009 for elucidation.
